**Lead generation is extremely
difficult, time consuming, and
expensive.**

The Agency Problem:

GENERIC APPROACH

Agencies communicate your offer to a broad audience based on assumptions, not data. This shotgun approach leads to low conversion rates.

LACK OF PROVEN OFFERS

They don't invest time in solidifying and validating your offer. They push out your message without confirming if it resonates with the audience.

MISSED TARGETING

Agencies may not identify the right target market. Like placing ads on Facebook, you're paying for exposure, not guaranteed engagement with the right audience.

INCONSISTENT RESULTS

Companies frequently switch agencies, spending thousands without seeing significant improvements in lead generation or sales.

They took the burden out of lead generation through their email marketing skills!” ★★★★★

— Wendy Oke, CEO @ TeachKloud

“We offer outsourced IT and CyberSecurity solutions to our clients and were struggling with lead generation. “We had needed help with our lead generation and Social Bloom set it up in automatic mode for us. The original goal was to contact more than 300 companies a month and 20-30 sales qualified prospects. The lead gen campaigns were very successful and we still get customers signing up for our PPC bidding program! They really are a lead generation machine. Worth adding to help your sales team in any industry in my opinion.” ★★★★★

“We wanted new leads as well as test new ICP verticals but rather have experts do it. Social Bloom were fantastic. They booked 20+ booked calls with sales qualified leads in the first couple of months and 30+ leads overall. They felt like an extension of our team and I couldn't recommend them more highly.”

“Found out about Social Bloom from a cold email from the founder. We were looking for a successful outbound campaign for more leads. After 90 days we had 20+ booked calls and a lead gen system that we now own without more retainers. SocialBloom's experience, beyond email, was impressive. They brought a sophisticated revenue operations perspective to our campaign.” ★★★★★

“The lead gen channels they set up for us performed VERY well and helped us generate about \$150,000 in sales on a monthly basis. Social Bloom communicated incredibly, stayed open to feedback, and responded to questions and concerns quickly. Great partner and project was a huge success (especially since we hadn't seen great results with lead gen agencies)”

“I lead business development efforts for our marketing services division. We were in a situation where we needed way better processes to identify new qualified opportunities. Social Bloom came in with a very distinct POV on THEIR process and why it works and we were able to demonstrate immediate success. To date it is the strongest pipeline of qualified opps we have had and the work continues today.

Impressive.”

“There's an art to successful email campaigns, and Caleb (owner of Social Bloom) is an expert at it. We initially wanted an email marketing strategy to actively reach out to acquire new clients. We didn't want our emails to look like advertising but more as personal emails to the recipients. Caleb and his team were very knowledgeable and set up a powerful platform for us. We'd initially considered a number of email marketing firms but the deciding factor was when SocialBloom told us that mass email campaigns simply don't work. Very happy with results.”

“Our lead pipeline tripled from what it was previously with Social Bloom. They gave us personal connections that we wouldn't have had the opportunity to pursue previously. Very impressed by their willingness to go the extra mile. When things weren't quite clicking with the email campaigns they would research and look at what might not be working or what tweaks needed to be made. They are thought leaders in the email marketing space and do exactly what they say they Will ” ★★★★★
